

# Skin Integrity Helping to protect our NHS

Maintaining skin integrity for the many faces of NHS front line staff is important. **Skin damage is typically reported on the nose, cheeks and forehead.**

**Several products that are already widely used for wound and skin integrity may be suitable to help protect fragile skin from damage. Additionally our new skin sensitive products with gentle silicone adhesive are now available.**

Please ensure that the functionality and fitting of the mask is not compromised during use of any additional products. Refer to your local or national policy or guidelines before use.

Product	Key benefit	Size	Content	Order code	NHS SC Code

# Introducing Leukoplast skin sensitive technology

Fragile and compromised skin has special needs when it comes to fixation. Leukoplast offers a solution for gentle dressing application and removal in everyday medical care.

- Prevention of adhesive-related skin damage
- Atraumatic removal
- Comparable wear time to acrylic adhesive films\*
- Secure fixation

## Leukoplast® Hypafix® skin sensitive wide area fixation

For fixation of larger wound dressings

- Suitable for highly sensitive, delicate, cracked, fragile, diabetic skin
- Can be cut to desired shape and size
- Especially suitable for moving body parts
- Latex-free

## Leukoplast® skin sensitive fixation tape

For secure fixation of wound dressings

- Suitable for highly sensitive, delicate, cracked, fragile or diabetic skin
- Easy to tear by hand without need of scissors
- Fast and easy application
- Maintains skin integrity
- Latex-free

## Leukoplast® Leukomed® T skin sensitive transparent film dressing

For secure wound protection on fragile skin

- Protects against friction and shear forces
- Bacteria and waterproof protection of post-operative wounds, cuts and abrasions
- Sterile fixation of primary dressings
- Additional fixation of devices
